

## COVID-19 Statement

March 20, 2020

To our Customers, Partners and Supporters,

The Coffee Cherry Company team (TCCC) extends our deepest sympathies and support to all those who have been impacted by the current Covid-19 outbreak at home and around the world. This is likely to affect all of us at some point, in some way; schools are closing, events are being canceled, social gatherings are being restricted to smaller numbers of people, and many are being asked to work from home. Legislation from the federal, state and local governments is being discussed and voted on.

This continues to be a very fluid situation and, unfortunately, in most countries we are not yet ahead of the curve, so are doing our best to react as circumstances dictate.

In light of these facts TCCC has stepped up our information gathering from the FDA and the CDC and are adjusting our processes as recommended or needed.

In a briefing March 18, 2020 by the US FDA these facts were emphasized:

- There is no evidence that this virus can be transmitted via food or its packaging
- If a food worker tests positive, there is no need to recall or shut down food production

TCCC will continue to monitor, adjust and communicate as needed. We sincerely appreciate your continued interest in Coffee Cherry. Food safety has been a core element to Coffee Cherry, and we assure you that this important brand and product underpinning will continue.

Tom Clemente
